STAINLESS

PETERBILT BATTERY & TOOLBOX COVERS

Trux Accessories Tool and Battery Box Covers are designed for the everyday driver. These Box Covers are made of 14 Ga. Heavy Duty 304 mirrored stainless with reinforced bracing inside all stress areas. Not only are they made with quality stainless, they are also engineered to easily access your batteries and tools, compared to the current after-market covers that only allow access after tirelessly removing all bolts and nuts. Trux has designed a rubber and stainless "Quick T-Bar Latch" that will make the removal of all bolts and nuts to access your batteries / tools a thing of the past.

TP-1662

DESIGNED TO FIT

Peterbilt 379 (1988-2007)

Peterbilt 389 Glider Models (All Years)

FEATURES

- Simple Installation
- Quick T-Bar Latches allows for removing the covers by hand
- Hardware included
- 304 Mirror Stainless
- Heavy Duty 14 Ga. with internal bracing

EASY INSTALLATION WITH TRUX'S "QUICK T-BAR" LATCH SYSTEM

INSTALLATION:

Trux Toolbox cover conveniently installs over your existing toolbox with no modification to the OEM box. The battery box cover installs similarly once the OEM box cover/lid is removed. The box covers include all hardware to install the "Quick T-Bar Latches".

An Easy Install that allows you to remove the covers by hand vs. using tools. I believe they call this a winner!
